fast. easy. affordable.

Our Content Management Solution eliminates IT Web development bottlenecks and empowers business professionals to rapidly and cost-effectively publish dynamic, business-driven Web sites enabling organizations to improve communication, respond to changing market demands, support new business initiatives, and contain costs.

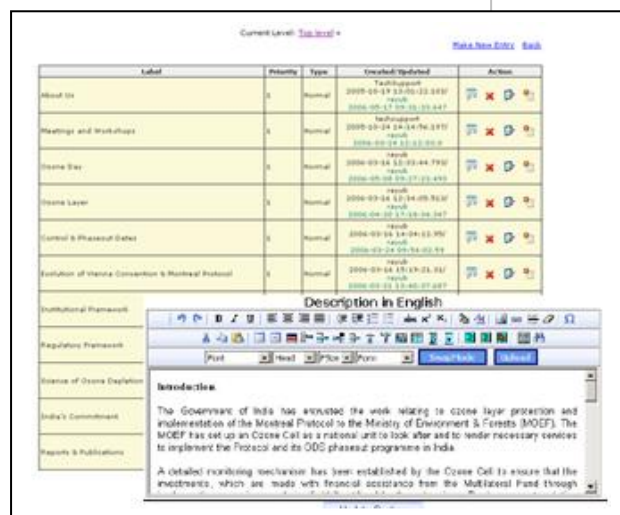

Our solutions are fast to deploy—no matter how uncommon your requirements. Our intuitive, wizards-driven interface makes it easy to empower non-technical contributors to create and manage Web content—without expensive, lengthy training.

with our Content Management Solution you can:

- Build a dynamically updated Web site in weeks, not months
- Empower non-technical staff to easily publish content directly to the Web
- Reduce ongoing operational costs for managing Web content
- Keep your Web site fresh and up-to-date
- Enforce a consistent 'look and feel' throughout your site
- Shorten the implementation time for new projects dramatically
- Control who can edit, access and view content securely
- Personalize and target content to specific audiences
- Increase content value through content classification and associations
- Centrally manage branding, navigation, layout, and corporate publishing standards through authoring and presentation templates.
- Improve the user experience through information discovery

features & benefits

Creating and editing content in our Content Management Solution is simple. Content can be edited right within the Web page, by any non-technical contributor using a powerful Rich Text Editor.

Bridge the gap between Business and IT.

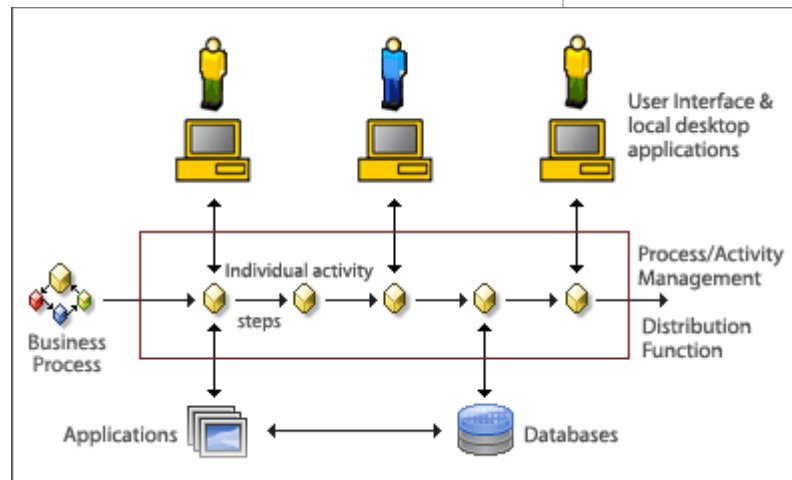

Our Workflow Management Solutions provide a complete platform for collaborative business process management that allow you to improve process efficiency across your extended enterprise.

with our Workflow Management Solution you can:

- Improve productivity
- Control your business better
- Integrate with third party legacy systems
- Improve Customer service
- Integrate Applications

features & benefits

Typical Workflow Model →

**IMAGINE.** IF YOUR BUSINESS COULD CONSOLIDATE UP-TO-THE-MINUTE INFORMATION FROM MULTIPLE DATABASES OR SERVERS.

**IMAGINE.** IF YOUR GLOBAL OFFICES AND MOBILE WORKFORCE COULD ACCESS THIS INFORMATION - NO MATTER WHERE THEY ARE IN THE WORLD.

A SMART SOLUTION IS WHAT YOU'VE BEEN LOOKING FOR.

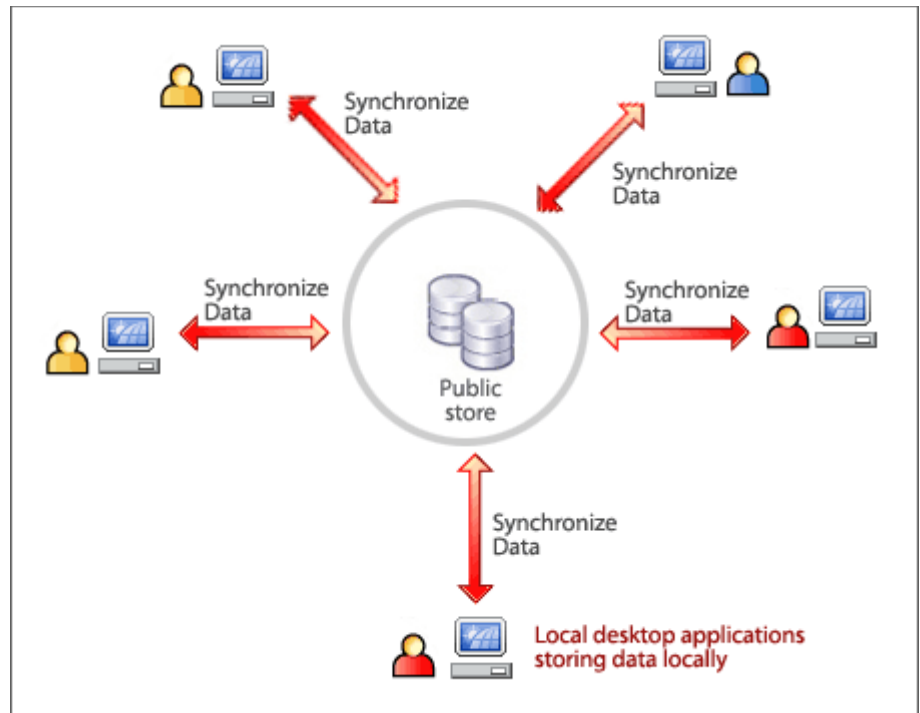

our distributed database management solution allows you to create a single database architecture that combines data from multiple sites, servers and applications. it allows you to distribute data across multiple servers and data centers, reducing single points of failure, streamlining backup procedures, and establishing disaster avoidance capabilities.

our solution supports synchronization between different relational databases, residing on different platforms and with nearly any connection capability.

it's a scalable solution that can grow as your business grows, with no limitations as to the number of databases or the volume of transactions it can handle.

## key features

- Multi locational data synchronization
- Non intrusive to applications (both online and offline)
- Data access via SQL
- Capability to handle any RDBMS
- Extendable functionality to legacy applications
- Application updates

accessible. affordable. fast!

Our Intranet features a suite of clever web applications to enhance, empower and increase the efficiency of your organization.

## key features

- Document Manager
- Calendars
- Access Rights Management
- Contact Manager
- Opinion Polls
- Web Based Email
- Bulletin Board
- Shared Links
- Auto Notification
- Company Memos
- User Administration
- Settings

# Workforce Management Solution

Our Workforce Management Solution benefits companies that face complex workforce management challenges.

Our solution allows organizations to automate all aspects of workforce management, including staff scheduling, workforce planning, time and attendance and payroll. By streamlining workforce operations and providing real-time analytical insight into productivity and performance, our solution drives real cost savings and impressive ROI.

## key features

- Multiple scheduling views, including, daily, weekly, monthly, yearly, by location, by resource or physician side-by-side
- Rules-based scheduling prevents appointments from being scheduled if they conflict with office-set criteria
- Workload management
- Peer reviews
- Manage vacation requests
- Create and print customizable forms
- Search for scheduled appointments

Bridge the gap between customers, employees, partners and students, refine and update skills and collaborate knowledge management.

The screenshot displays the Agnicient enabler interface. The main content area shows a math problem: "Three cars A, B and C are running along a circular track of circumference 900 m in the same direction at speeds 10 km/hr, 15 km/hr and 12 km/hr, respectively, starting from the same point at the same time. When will they meet together for the first time? When will they all be together at the start line for the first time?". Below the text is a diagram of a circular track with three cars (A, B, and C) at different positions. A timer shows 00:01:44. A text box below the diagram provides the solution: "Speeds: A = (10/5/18) m/s = 50/18 m/s, B = (15/5/18) m/s = 75/18 m/s, C = (12/5/18) m/s = 60/18 m/s. Their speed: B w.r. A, (75/18 - 50/18) m/s = 25/18 m/s. Time taken to meet A: by B (900 \* 18/25) s = 648 s".

On the right side, there is a video feed of a presenter, a "C Classroom" table, and a control panel.

Name	Status	Question	Join
Humber 1	👤	🗨️	19s
Humber 3	👤	🗨️	19s
Humber 2	👤	🗨️	19s
Dellu 1	👤	🗨️	19s
Dellu 2	👤	🗨️	19s
Blore 1	👤	🗨️	19s

Control panel options: take a break, start a session, raise a poll.

- Live classrooms
- Schedule training sessions
- Real time interactive audio/video conferencing
- Share applications
- Learning object repositories
- Self paced learning
- Online seminars
- Interactive flash based content

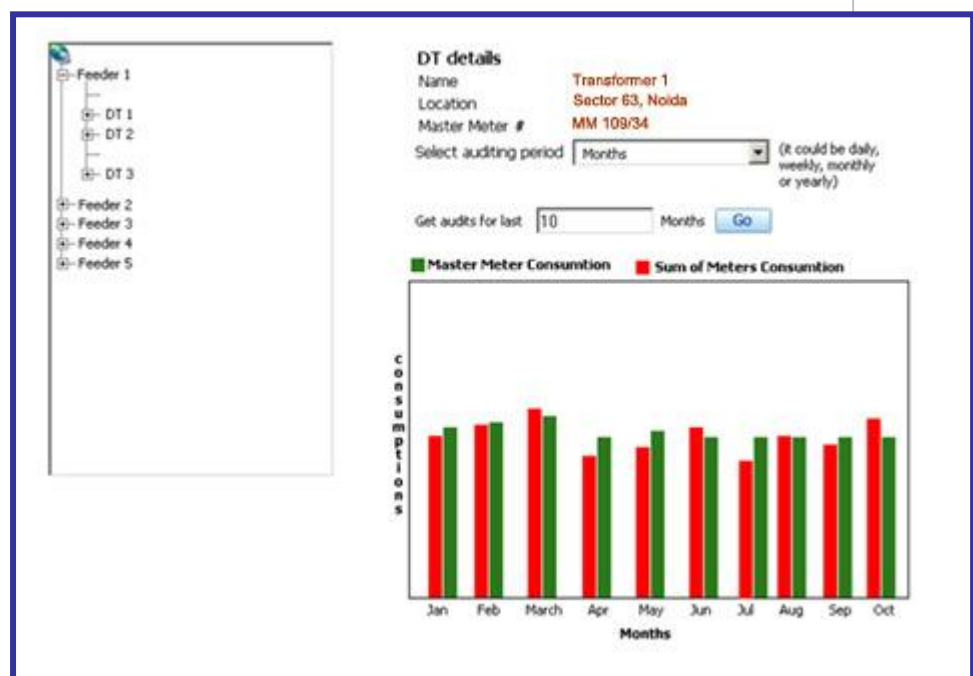

## Address your losses. FAST!

### key features

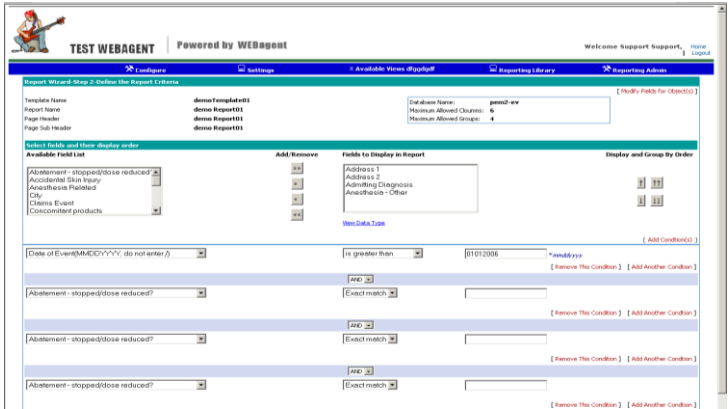

- 1) Directly addresses your losses and pilferage.
- 2) Generates alarms to facilitate prompt corrective measure
- 3) Audits can be conducted at DT level/service level/feeder level or zone level
- 4) MIS reports on consumption patterns can be generated on a quarterly basis/zone wise basis/circle wise basis
- 5) The entire system works on inputs from only one source.

#### Meters

- 6) Every meter supplies three basic data elements – **reading**, **meter no.** and **timestamp**

Have your business's metrics at your fingertips.  
**24/7, 365 days a year**

- **Dashboards are web browser-based**
- **Each metric is provided as a self-contained Key Performance Indicator, or KPI.**
- **Graphics are emphasized in order to promote intuitive understanding**
- **The dashboard data is updated automatically from the business's information systems.**
- **The most useful dashboards have the ability to "drilldown."**
- **Built-in security provides for multi-level dashboard access**
- **Goal information is provided side-by-side with actual results**
